

HIRING

(REMOTE OR OFFICE) BUSINESS ANALYST

Striving for excellence is in our DNA. Since 1993, we have been helping the world's leading companies imagine, design, engineer, and deliver software and digital experiences that change the world. We are more than just specialists; we are experts.

EPAM is committed to providing our global team of 36,700+ EPAMers with inspiring careers from day one. EPAMers lead with passion and honesty and think creatively. Our people are the source of our success and we value collaboration, try to always understand our customers' business, and strive for the highest standards of excellence. In today's new market conditions, [we continue to support operations for hundreds of clients](#) around the world remotely, with the vast majority of our teams working from home. No matter where you are located, you will join a dedicated, diverse community that will help you discover your fullest potential.

No less important is the safety, well-being, and experience of our applicants. Therefore, until further notice, all EPAM employment interviews will be conducted remotely. Our recruitment professionals and hiring managers are standing by to ensure a robust and engaging virtual candidate experience. We look forward to speaking with you!

JOB DESCRIPTION

We are looking for a **Business Analyst** to join our team in Budapest.

- Responsibilities
 - Plan and establish business analysis activities
- Identify and manage stakeholders
- Collect and analyze software requirements and turn them into high quality requirement specifications
- Create and maintain detailed project artifacts, technical specifications, prototypes, diagrams and processes

- Visualize complex solutions, validate and verify solution requirements
- Communicate with stakeholders daily, handle business questions and deliver business answers, translate technical findings for non-technical teams and vice versa
- Maintain and improve requirement management and/or software development processes through the whole project life cycle.

REQUIREMENTS

- 2+ years of work experience as a Business Analyst in software development projects
- Experience in organizing business analysis at the outset of a project
- Experience in gathering and formalization/regulation of requirements
- Experience in modeling and analysis of business processes as well as in creating system prototypes and user interfaces
- Experience with Agile methodologies
- Knowledge of different software development methodologies (RUP, Waterfall, Scrum, Kanban)
- Strong communication skills
- Upper-Intermediate+ level of English
- Creative approach to problem-solving
- Analytical and critical thinking

NICE TO HAVE

- Experience in working on-site with the clients
- Technical background
