(REMOTE OR OFFICE) DELIVERY MANAGER

Striving for excellence is in our DNA. Since 1993, we have been helping the world's leading companies imagine, design, engineer, and deliver software and digital experiences that change the world. We are more than just specialists; we are experts.

EPAM is committed to providing our global team of 36,700+ EPAMers with inspiring careers from day one. EPAMers lead with passion and honesty and think creatively. Our people are the source of our success and we value collaboration, try to always understand our customers' business, and strive for the highest standards of excellence. In today's new market conditions, [we continue to support operations for hundreds of clients](#) around the world remotely, with the vast majority of our teams working from home. No matter where you are located, you will join a dedicated, diverse community that will help you discover your fullest potential.

No less important is the safety, well-being, and experience of our applicants. Therefore, until further notice, all EPAM employment interviews will be conducted remotely. Our recruitment professionals and hiring managers are standing by to ensure a robust and engaging virtual candidate experience. We look forward to speaking with you!

JOB DESCRIPTION

We are looking for a **Delivery Manager** to join our team in Debrecen

RESPONSIBILITIES

- Manage the implementation and configuration of various systems and solutions. Engage with the client in discussions of the business situation and strategy. Work with the business users for defining the project scope and timelines. Formulate and execute project plans, and
- manage cross-functional, distributed project teams across multiple geographies, solution practices and business domains
- Drive a profitable engagement where a mid- or high-scale solution or a portfolio/ecosystem of a smaller ones for the client works and brings business value; it works with minimal customer push or escalations; the solution is reliable and scalable itself (proven architecture used); the solution is delivered in time and within defined quality metrics; any post-deployment issue has one stable fix
- Self-motivated, pro-active individual, comfortable working in fast paced environment. Ability to drive a project from concept to delivery

REQUIREMENTS

- 8+ years of hands-on software development experience with at least 3+ years in IT project management
- BS ME/EE/CE degree or equivalent
- Being a self-starter with a strong sense of personal responsibility and ownership
- Prior experience in leading a technical team to deliver quality software implementations
- Experience in designing and implementing large distributed, scalable, reliable and highly-available solutions proven experience in architecture combined with strong OO design skills, understanding of enterprise software design patterns and data structures
- Solid knowledge of software development life cycle
- Excellent project management experience: planning, scheduling, project communication, issue resolution, change management, and risk management
- Extensive experience in managing projects with at least 10-12 month duration
- Excellent leadership and communication skills
- Ability to manage the cross functional team consisting of developers, vendors, and business users
- Experience with issue resolution across multiple locations and businesses
- Demonstrated skill in client relationship management and ability to manage, direct and command respect from technical and delivery team members
- Ability to engage with the client in technology discussions
- Experience in the design and implementation of continuous integration and delivery setups
- Strong ability to learn new technologies in a short time

WE OFFER

- Permanent job with remote work opportunity
- Widespread training and development opportunities, language courses, soft-skill trainings
- Vast opportunities for self-development, unlimited access to LinkedIn Learning, GAL trainings
- Multilingual work environment
- Competitive salary and benefit packages (private health care, sportcard, fringe benefits)
- International projects, working in hybrid teams with high-skilled peers
- Sport and social teams support, advanced CSR programs
