Our recruitment professionals and hiring managers are standing by to ensure a robust and engaging virtual candidate experience. We look forward to speaking with you!

JOB DESCRIPTION

We are looking for a **Big Data Solution Architect** to join our team in Hungary.

RESPONSIBILITIES

- Work closely with business in identifying solution requirements and key case-studies/scenarios to architect data solution for business transformation
- Participate in Data and Big Data initiatives on a company level
- Design data analytics solutions by utilizing the data technology stack with Big Data techniques
- Conduct solution architecture review/audit, calculate and present ROI
- Create and present solution architecture documents with deep technical details to customer and implementation teams
- Lead implementation of the solutions from establishing project requirements and goals to solution "go-live"
- Maintain a strong understanding of technical solutions and architecture design trends and best practices, stay on cutting edge of Data technologies
- Create and follow personal education plan in the technology stack and solution architecture

REQUIREMENTS

- 5+ years experience as a Data Architect with design/development background with Java/Scala or Python
- Architecture experience and practice in Data Management, Data Storage, Data Visualization, Disaster Recovery, Integration, Operation and Security
- Wide experience in analysis, design, implementation, deployment as well as troubleshooting and rebuilding distributed Linux based platforms and Big Data solutions on premises and in Cloud
- Strong Cloud experience in at least one of the Cloud providers (AWS, Azure, GCP)
- Solid experience in continuous delivery tools and technologies
- Broad experience with Containers and Resource Management systems: Docker, Mesos, Kubernetes/OpenShift, Yarn
- Able to deliver Data Analytics projects and architecture guidelines
- Strong in research, comparison and selection of tools / technologies / approaches to be used
- Practical experience in performance tuning and optimization, bottleneck problem analysis
- Strong communication skills, experienced in team coordination skills and solution implementation supervision
- Good in Agile development methodology, Scrum in particular
- Solid skills in business analysis, network/stack architecture, troubleshooting, support

WE OFFER

- Permanent job with remote work opportunity
- Widespread training and development opportunities, language courses, soft-skill trainings
- Vast opportunities for self-development, unlimited access to LinkedIn Learning, GAL trainings
- Multilingual work environment
- Competitive salary and benefit packages (private health care, sportcard, fringe benefits)
- International projects, working in hybrid teams with high-skilled peers
- Sport and social teams support, advanced CSR programs
