Embedded Linux Engineer

Striving for excellence is in our DNA. Since 1993, we have been helping the world's leading companies imagine, design, engineer, and deliver software and digital experiences that change the world. We are more than just specialists; we are experts.

EPAM is committed to providing our global team of 58,800+ EPAMers with inspiring careers from day one. EPAMers lead with passion and honesty and think creatively. Our people are the source of our success and we value collaboration, try to always understand our customers' business, and strive for the highest standards of excellence. In today's new market conditions, [we continue to support operations for hundreds of clients](#) around the world remotely, with the vast majority of our teams working from home. No matter where you are located, you will join a dedicated, diverse community that will help you discover your fullest potential.

No less important is the safety, well-being and experience of our applicants. Therefore, until further notice, all EPAM employment interviews will be conducted remotely. Our recruitment professionals and hiring managers are standing by to ensure a robust and engaging virtual candidate experience. We look forward to speaking with you!

JOB DESCRIPTION

Our client is the #1 player in the United States in the field of set top boxes and sound bars. As an embedded linux developer, you will be responsible for improving the code and the general app architecture of Linux based media playback devices. **The position is based in Dallas, TX and ideally the candidate is willing to relocate there.**

RESPONSIBILITIES

- Improve the existing codebase, find and analyse errors and bug reports
- Execute large scale refactors
- Create firmware update packages
- Support internal software, product, and QA teams

- Assess third party and open source software
- Analyze and enhance efficiency, stability and scalability of platform resources

REQUIREMENTS

- Embedded Linux experience is a must.** Having extra XP with RTOS or barebone based embedded development is a big plus. The work is done on service/middleware level, no UI or kernel level experience is required.
- General knowledge of multimedia: audio formats and mixing, video formats / colorspace, basics on media encoding, streaming, etc.
- HDMI and related XP is not necessary, but a very big plus. If the candidate does not have these - the company can help acquiring the knowledge after onboarding.

WE OFFER

- Widespread training and development opportunities, language courses, soft -skill trainings
- Vast opportunities for self-development, unlimited access to LinkedIn Learning, GAL trainings
- Multilingual work environment
- Competitive salary and benefit packages (private health care, sportcard, fringe benefits)
- International projects, working in hybrid teams with high -skilled peers
- Sport and social teams support, advanced CSR programs

HOW TO APPLY

If you are interested in the above-mentioned position, please send a detailed CV (in English) referring to the position to: job_hu@epam.com
