- You will be responsible for the delivery of the agile cross-functional team, lead the team from the initiatives till the implementation
- Conduct code reviews
- Take part in the development of native mobile apps with Android
- Work within a distributed global team of developers to complete proposed initiatives, contributing application architecture and implementation guidance
- Quickly gain an understanding of our clients' requirements, technology needs and solution architecture
- Collaborate with clients and internal teams to develop appropriate solutions
- Brainstorm with team members and prove ability to think on the fly

What You Have

- Android development skills (5+ years of experience)
- Kotlin hands-on experience
- Kotlin coroutines, Flows
- Dagger2/Hilt dependency injection
- Android Jetpack Compose
- Understanding of mobile application design and UX
- Git
- Design patterns (GoF) and architecture of the applications
- MVVM/Clean architecture development experience
- Unit testing
- GraphQL
- UI testing, Espresso
- Gradle advanced usage (plugins + configurations)
- Experience working in agile teams

We Offer

- Dynamic, entrepreneurial, high speed, high growth corporate environment
- Diverse multicultural, multi-functional, and multilingual work environment
- Opportunities for personal and career growth in a progressive industry
- Global scope, international projects
- Widespread training and development opportunities
- Unlimited access to LinkedIn learning solutions
- Competitive salary and various benefits
- Advanced wellbeing and CSR programs, recreation area
