

Senior Android Developer

HUNGARY

Senior Android Developer Description

As an **Senior Android Developer**, you will be building native mobile applications for Fortune 500 companies. You will be working in close collaboration with the client, as well as other teams across EPAM paying special attention to solutions' architecture and code quality.

What You'll Do

- You will be responsible for the implementation of features described in the requirement specifications and design documents
- You will be responsible for designing and implementing sub-systems or whole solutions
- You will be responsible for mentor less experience team members
- Conduct code reviews
- Take part in the development of native mobile apps with Android
- Work within a distributed global team of developers to complete proposed initiatives, contributing application architecture and implementation guidance
- Quickly gain an understanding of our clients' requirements, technology needs and solution architecture
- Collaborate with clients and internal teams to develop appropriate solutions
- Brainstorm with team members and prove ability to think on the fly

What You Have

- Android development skills (3+ years of experience)
- Kotlin hands-on experience
- Kotlin Coroutines, Flows
- Dagger2/Hilt dependency injection
- Android Jetpack Compose
- Understanding of mobile application design and UX
- Git
- Design patterns (GoF) and architecture of the applications
- MVVM architecture-based development experience
- Unit testing
- GraphQL
- UI testing, Espresso
- Gradle advanced usage (plugins + configurations)
- Experience working in Agile teams
- Good command of English: Intermediate spoken level and higher
- Mentorship
- SOLID/DRY/YAGNI coding principles
- Modularization
- Detect and diagnose crashes, performance issues

Nice to have

- A/B testing
- Android Jetpack libraires: Navigation, WorkManager
- CI/CD setup, maintenance
- BFF API pattern
- Detect and diagnose crashes, performance issues

We Offer
