SENIOR/LEAD JAVASCRIPT DEVELOPER

HUNGARY

Job description

We are looking for a Senior/Lead Javascript Developer to join our team in Hungary. You can work with latest technologies and we are providing opportunities to deepen your technical knowledge (e.g.: Cloud technologies) on our various projects.

Responsibilities

- Implement user interfaces for different applications based on pre-prepared design specifications
- Work with other project team members (UI designers, developers, system and testing engineers) throughout the product development, testing, and implementation phases to ensure user interface integrity
- Work with customers (project management, content editors) to implement the envisioned functionality
- Provide estimates for how much time it will take to complete the defined layout /development tasks
- Document the implementation and work products
- Observe the quality rules during the project, supply the QA Leader with upcoming ideas
- Fulfill requirements / responsibilities according to the Quality Management System
- Help identify, escalate, resolve any technical issues and problems that might occur
- Mentor other developers and collaborate with peers.

Requirements

- 5+ years of experience
- The role demands skills in Agile team organization and delivery, database and coding skills plus the ability to maintain an ongoing discussion with the stakeholders and partners
- Strong knowledge of and experience in JavaScript/Typescript/ CSS/ HTML 5 web layout design and implementation
- Expert knowledge in any combination Angular/React/Node.js development
- Experience in software development projects in cooperation with different development teams
- Experience in building cross-browser user interfaces
- Solid understanding of cross-platform browser compatibility issues
- The ideal candidate should have a broad understanding of various coding methodologies, testing practices, and tools and know when to apply each method to achieve the desired outcomes
- Fluent English is a must
- Excellent communication and problem-solving skills

Nice to have

- Experience with technical or team leadership is a huge advantage
- Willingness to work as a full-stack developer with C#(.NET)
- Experience in Cloud technologies (Azure, GCP, AWS)
- Knowledge of any database (SQL, NoSQL)
- Any kind of DevOps related experience

We offer

- Dynamic, entrepreneurial, high speed, high growth corporate environment
- Diverse multicultural, multi-functional, and multilingual work environment
- Opportunities for personal and career growth in a progressive industry
- Global scope, international projects
- Widespread training and development opportunities
- Unlimited access to LinkedIn learning solutions
- Competitive salary and various benefits
- Sport and social teams support, recreation area, advanced CSR programs
