Senior/Lead .NET developer

EPAM is a leading global provider of digital platform engineering and development services. We are committed to having a positive impact on our customers, our employees, and our communities. We embrace a dynamic and inclusive culture. Here you will collaborate with multi-national teams, contribute to a myriad of innovative projects that deliver the most creative and cutting-edge solutions, and have an opportunity to continuously learn and grow. No matter where you are located, you will join a dedicated, creative, and diverse community that will help you discover your fullest potential.

We are looking for a **Senior .NET developer** to join our team in Hungary. If you are looking to give your career a real boost with a global leader in digital transformation, EPAM is the perfect choice. As a Senior .NET Developer, you will be responsible for designing and implementing sub-systems or whole solutions.

Responsibilities

- Develop and maintain scalable and efficient code for various software projects

- Troubleshoot and debug issues in the software development lifecycle

- Mentor junior developers and provide guidance on best practices

- Optimize applications for maximum speed and scalability

- Ensure security and data protection standards are met

Requirements

- Deep knowledge of and at least 3-5 years of experience in .NET development using C#

- Experience with at least one major area in .NET (e.g., ASP.NET)

- Good understanding of computer science fundamentals, clean code, programming principles, and design patterns

- Experience in system design and architecture (patterns and practices, e.g., messaging, microservices)

- Basic experience with cloud providers (e.g., Azure or AWS)

- Good understanding of the SDLC processes and tools (e.g., code reviews, distributed version control, testing)

- Good English communication skills (B1+ overall language level)

Nice to have

- Experience in front-end development (HTML, CSS, JavaScript, TypeScript) and frameworks (e.g., React, Angular, Node.js, Vanilla JS)

- Experience with database technologies (relational and/or non-relational databases, query languages, and ORMs)

- Experience with CI/CD, DevOps, and related tools (e.g., TeamCity, Octopus Deploy, Jenkins, Docker)

- Experience working in an agile development environment (like Scrum or Kanban, with tools like JIRA or Trello)

We offer

- Dynamic, entrepreneurial corporate environment

- Diverse multicultural, multi-functional, and multilingual work environment

- Opportunities for personal and career growth in a progressive industry

- Global scope, international projects

- Widespread training and development opportunities

- Unlimited access to LinkedIn learning solutions

- Competitive salary and various benefits

- Advanced wellbeing and CSR programs, recreation area
